EXPERIENCE

INDEPENDENT PROJECT VENTURES

- I've honed my ability to translate client requirements into visuals, crafting drawings and layouts both manually and digitally. This skill was pivotal in my leadership role during the redesign of an e-commerce site. Here, I improved user experience and incorporated secure payment gateways. In another project, I navigated UI/UX design for a travel app, enhancing usability through user-centric design. I adeptly employ design software to align aesthetics with client expectations, further strengthening my creative prowess.

FREELANCE GRAPHIC DESIGN AND CYBERSECURITY FOCUS

- Beyond traditional roles, I've freelanced in graphic design, crafting impactful brand identities that resonate with audiences. Simultaneously, I've engaged in personal cybersecurity initiatives, successfully conducting security audits and implementing measures such as SSL encryption for improved website safety.
